

SUSTAINABILITY POLICY

Park Elektrik takes care to develop its activities in an integrated manner with the sustainability approach it adopts as part of our business model.

In this context;

- To follow national and international practices in the field of sustainability, to fulfill commitments in this regard and to seek to support voluntary practices,
 - To conduct regular Stakeholder Analysis to identify material issues for our company and our stakeholders by assessing environmental and social risks and opportunities in the context of sustainability,
 - To assess the sustainability priorities identified in the Stakeholder Analysis as an important part of our business strategy, and to monitor and transparently report our performance against them,
 - To closely follow the development of energy efficiency and renewable energy projects, while working to reduce greenhouse gas emissions in line with the combat against climate change, and to try to raise awareness of the combat against climate change among all our stakeholders, especially our business partners and employees,
 - To monitor and seek to minimize the impact of our activities on the environment, natural resources and biodiversity,
 - To create a safe, healthy and modern work environment where our employees can work peacefully, have equal opportunities, and are supported in their professional and personal development,
 - To establish mechanisms through which all stakeholders can communicate their wishes, requests and complaints, and to create the necessary mechanisms for evaluation, reporting and feedback,
 - To promote the adoption of our company's sustainability approach by all stakeholders in our value chain and to organize ongoing sustainability awareness activities,
- are the basic principles of our Sustainability Policy.
